Home Environment Control with the Gewa PROG III Infra Red Transmitter

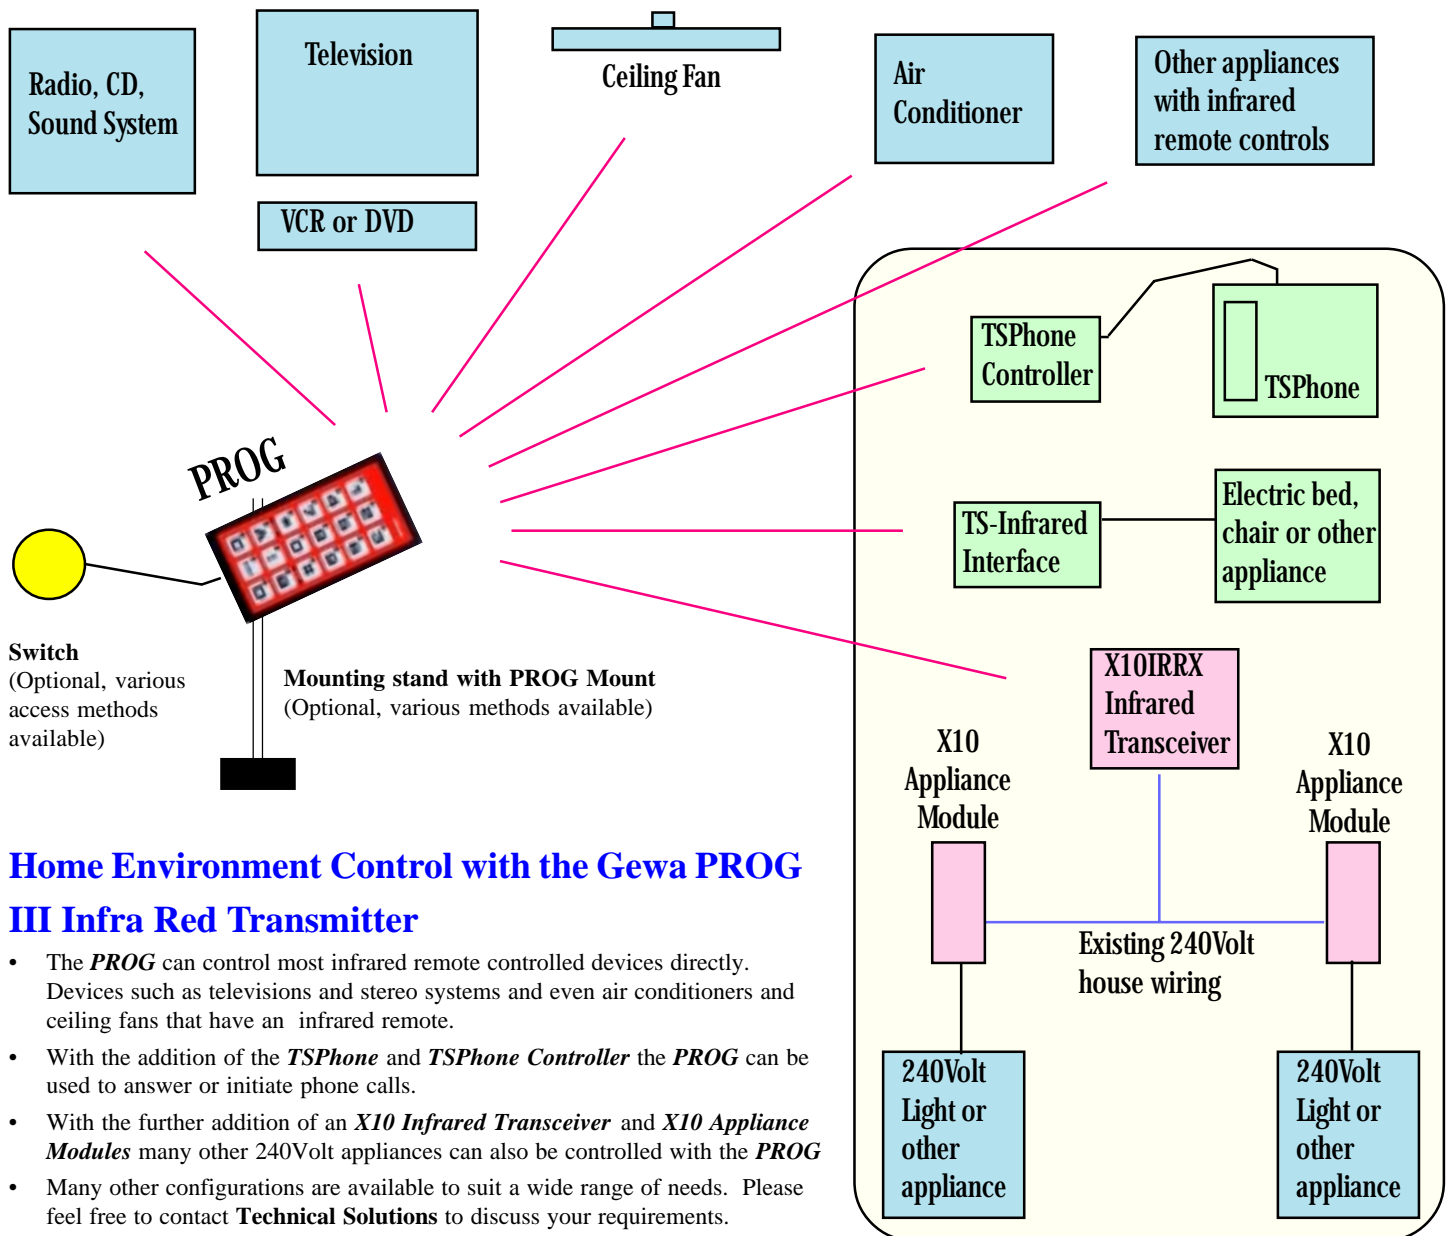

With one small remote transmitter the user can operate and control virtually everything electrical in his or her environment.

The **PROG** can be used in a scanning mode with single or multiple switches or a joystick, or by pressing its 18 key keypad. It learns infra red codes from your original remote controls.

Up to 10 levels or pages can be used, giving over 150 individual functions. A wide variety of scanning strategies are built in.

You can also link the **PROG** to a computer to store and retrieve information as well as using the computer to control the **PROG**.

The **PROG** is light and small, measuring only 64 x 120 x 27mm. It is ideal for wheelchair use.

Home Environment Control with the Gewa PROG III Infra Red Transmitter

- The **PROG** can control most infrared remote controlled devices directly. Devices such as televisions and stereo systems and even air conditioners and ceiling fans that have an infrared remote.
- With the addition of the **TSPhone** and **TSPhone Controller** the **PROG** can be used to answer or initiate phone calls.
- With the further addition of an **X10 Infrared Transceiver** and **X10 Appliance Modules** many other 240Volt appliances can also be controlled with the **PROG**
- Many other configurations are available to suit a wide range of needs. Please feel free to contact **Technical Solutions** to discuss your requirements.
